- Intercom Option on model 1209 includes a speaker and push button for connection to an existing intercom system.

total access control

THE 1200 SERIES The models 1207 and 1209 are momentary contact devices and utilize a mortise cylinder that can be re-keyed by your locksmith to match other access keys. The model 1209 includes a built in eight ohm speaker, push button and is lighted. The 1209 is designed to be connected to an existing intercom system and used as a sub-station to the system. The model 1210 uses an ACE key cylinder that can be turned ON for constant contact applications, such as holding an electronic gate system open.
