**Access Control Features**

### Gate Locks | Magnetic Gate Locks

- **Custom Mounting**
  - Brackets can be fitted to pedestrian and vehicular gates of any diameter, angle, allowing for custom mounting of magnetic holding force throughout.

- **Magnetic Holding**
  - Will lift the pre-drilled brackets directly for the gate before engaging the magnetic holding force throughout.

### Shear Locks | Magnetic Door Locks

- **High Strength**
  - Shear locks offer 500 lb. of holding force by combining high strength magnets with mechanically interlocking steel tabs that slide into place and help prevent forced entry.

- **Magnetic Tight Closure**
  - Magnet shifts armature into place upon closure, creating a tight seal but quickly releasing upon entry for easy, reliable access.

### Deadbolts | Electric Door & Gate Locks

- **Dual Sensors**
  - Stainless steel deadbolts can’t be fooled, with both magnetic and mechanical sensors, door closure is ensured before securing deadbolt.

- **Adjustable Auto Re-lock**
  - Set a custom automatic re-lock time of 0-5 seconds – contact holding up to 30 seconds – providing a high degree of security depending on your application needs.

- **Fail-Safe**
  - Locked when energized, and in the event of power failure will unlock for safe exit and entry.

Set a custom automatic re-lock time of 0-5 seconds – instantly relocking upon closure for high security applications or with a longer grace period for convenient delivery access.

MAGNETIC AND ELECTRIC CONTACT LENS DÉCOR
**Access Control Features**

**Gate Locks** | Magnetic Gate Locks
---|---

**Custom Mounting**
Brackets can be tilted to protect the infill portion of the gate at any sloped angle, allowing for custom mounting of magnetic holding force hardware provided.

**Welding**
Weld the pre-drilled brackets directly to the gate before attaching the magnets before installing the hardware for hassle-free installation, maintenance & replacement.

**Shear Locks** | Magnetic Door Locks
---|---

**High Strength**
Shear locks offer 2000 lbs. of holding force by combining high-strength magnets with a magnetically interlocking steel tab that clicks into place and helps prevent forced entry.

**Magnetic Tight Closure**
Magnet shifts armature into place upon closure, creating a tight seal but quickly releasing upon entry for easy, reliable access.

**Deadbolts** | Electric Door & Gate Locks
---|---

**Mechanical Sensor**
Adjustable Auto Re-lock
Set a custom automatic re-lock time of 0-5 seconds – automatically relocking upon closure for high security applications or allowing for convenient delivery access.

**Dual Sensors**
Stainless steel deadbolts can’t be fooled, with both magnetic and mechanical sensors for closure is ensured before securing deadbolt.

**Fail-Safe**
Locked when energized, and in the event of power failure will unlock for safe exit and entry.

**ACCESS CONTROL**

**DOOR & GATE LOCKS**

MAGNETIC AND ELECTRIC
**Magnetic Gate Locks**

- **DKGL** Single Gates
  - 500 and 1200 Lb lock strength
- **DKGL-S12** 1200 Lb
- **DKGL-S6 600 Lb**

**Magnetic Door Locks**

- **DKML** Single and Double Doors
  - 300, 600, 1200, and 2000 Lb lock strength
- **DKML-S12 1200 Lb**
- **DKML-S6 600 Lb**

**Electric Door & Gate Locks**

- **DKSL** Strikes & Deadbolts Single Door or Gate
  - 300, 600, 1200, and 2000 Lb lock strength
  - **DKSL-M20 2000 Lb**

**Magnetic Gate & Door Lock Features**

- Superior reliability, strength and safety
- Fast and easy installation
- No moving parts to wear out or break
- Adjustable Auto Re-lock

**Emergency Safety**

- Magnetic locks can be programmed to be automatically unlocked in emergency situations such as fire, panic, or other life-saving events.

**Long Lasting**

- No moving parts to wear out or break down, ensuring a long life cycle.

**Transformer Box and Transformers**

- **Transformer Box**
  - 120 Volt DC power
  - Transformers are designed for indoor and outdoor use.
  - **DKSL-M20** transformer for 2000 Lb locks.

**Back-up Power Supply / Battery Charger**

- **Magnetic Locks** powered by 12 Volt DC power when main (AC) power is interrupted.
- **Features** include filtered and electronically regulated output, as well as on-board circuit overload protection.
- **Battery** charger for back-up power.
- **Enclosure** accommodates up to 2 12V, 7AH batteries.
- **Reliability** not yet included with these systems.

**Electric Strikes and Deadbolts**

- **Dual-Sensor Electric Deadbolts**
  - Provide superior security and safety with fail-safe and fail-secure models.
  - Operate on 12-volt DC power.
  - Suitable for most cylindrical door locks.
  - Available for indoor and outdoor use.

- **Deadbolt Strikers**
  - Suitable for most cylindrical door locks.
  - Easily retrofit into most door or gate frames.

**Accessories**

- **Back-up Power Supply**
  - Suitable for indoor and outdoor use.

- **Transformer Box and Transformers**
  - **DKSL-M20** transformer for 2000 Lb locks.

**Transformer Box and Transformers**

- **Transformer Boxes**
  - 120 Volt DC power
  - Transformer boxes come up to 1 transformer, and are suitable for indoor and outdoor use.
  - **Transformer Box** for 600 Lb locks and the 120 Volt DC power transformers for 800 Lb locks and the 120 Volt DC power transformers for 800 Lb locks.
Electric Door & Gate Locks

**Magnetic Gate Locks**
DKGL
- Single Gates 600 and 1200 Lb lock strength
- DKGL-S6-1200 Lb
- Magnetic and Armature

- Mounting brackets are predrilled/tapped for easy welding to the gate and assembly to the mag lock (brackets included), making for easy installation, repairs, and replacement.

- LED (R/G) lock status indicates if the lock is secured (green) or not secured (red).

- Electric dead bolts:
  - Provide superior security and safety with fail-safe and fail-secure operations.
  - Operate on 12-volt DC power.
  - 1/8 inch (3.175 mm) steel dead bolt with 5/8 inch throw.

- Electric strikes:
  - Suitable for most cylindrical door locks.
  - Operate on 12-volt DC power.
  - Door strikes are available in both fail-safe and fail-secure models.
  - Operate on 12 or 24-volt DC power.

- Magnetic locks:
  - 5/8 inch (15.875 mm) stainless steel.
  - Operate on 12-volt DC power.
  - Provide superior security and safety.

- Deadbolt and Strikes:
  - Electric dead bolts.
  - Electric strikes.
  - Battery operated.
  - Fail-safe operation.
  - Battery charger for indoor and outdoor use.
  - Batteries are not included.

- Transformer Box and Transformers:
  - Magnetic Locks: 12, 24 volt DC.
  - Transformer Box: Up to 4 transformers, and is suitable for indoor and outdoor use.
  - Use the 250VA transformer for 300 Lb locks, 300VA transformers for 600 Lb locks and the 600VA transformer for 1200 Lb locks.

**Magnetic Door Locks**
DKML
- Single and Double Doors 300, 600, 1200, and 2000 Lb lock strength
- DKML-S12 1200 Lb
- Armature and Maglock

- Long Lasting
- No residual magnetism
- Fast and easy installation
- Superior reliability, strength, and safety

- Adjustable Auto Re-lock:
  - Program a system re-lock time for up to 12 seconds.

- Dual Security:
  - Door deadbolts have both mechanical and magnetic closure sensors for added security and will automatically disengage when power is restored.

**Electric Door & Gate Lock Features**

- Adjustable Auto Re-lock
  - Program a system re-lock time for up to 12 seconds.

- Dual Security
  - Door deadbolts have both mechanical and magnetic closure sensors for added security and will automatically disengage when power is restored.

- Back-up Power Supply / Battery Charger
  - Magnetic locks power supplies for backup DC power when absence DC power is interrupted.

- Transformer Box and Transformers
  - Magnetic Locks: 12, 24 volt DC

**Accessories**

- Transformer Box and Transformers
  - Magnetic Locks: 12, 24 volt DC
  - Transformer Box: Up to 4 transformers, and is suitable for indoor and outdoor use.

- Transformer Box and Transformers available:
  - Use the 250VA transformer for 300 Lb locks, 300VA transformers for 600 Lb locks and the 600VA transformer for 1200 Lb locks.

**Emergency Safety**

- Magnetic Gate Locks can be programmed to be automatically unlocked in emergency situations such as fire or medical emergencies.

- No moving parts to wear out or break ensuring a long life cycle.

**Magnetic Gate Locks**
- Single Gates
- 600 and 1200 Lb lock strength
- Magnetic and Armature with Welding Mounting Brackets
**Electric Door & Gate Lock Features**

- **600 and 1200 Lb lock strength**
- **Single Gates**
  - DKGL
  - Magnetic Gate Locks
  - **Magnetic Gate Locks**
    - Mounting brackets are predrilled/tapped for easy welding to the gate and assembly to the mag lock (brackets included), making for easy installation, repairs, and replacement
  - Predrilled/tapped electrical enclosure conduit holes
  - Built-in relay on selected models for gate lock status indication

- **Emergency Safety**
  - Emergency safety routes for all occupants.
  - Outages, ensuring fail-safe escape situations such as fires or power outages, are automatically unlocked in emergency situations.
  - Fail-safe operation assures that fire exit paths are unlocked during power outages.
  - No residual magnetism
  - Fast and easy installation
  - Superior reliability, strength, and safety

- **Strength**
  - 2000 Lb (907 Kg)
  - Holding force of 300 Lb (136 Kg)

- **Deadbolt and Strikes**
  - Electric deadbolts provide both a magnetic and mechanical closure offering superior locking strength
  - Adjustable Auto Re-lock
    - Program a custom automatic re-lock time of 0-5 seconds for different access points and uses.
  - Dual Security
    - Deadbolt door locks have both mechanical and magnetic strike sensors for ensured security and will automatically lock even when the power is disconnected.

**Transformer Box and Transformers**

- **Magnetic Locks**
  - 24 Volt DC
  - Transformer box includes up to 4 transformers, and is suitable for indoor and outdoor use
  - **DF transformers and Regular DKS transformers** available

**Magnetic Gate & Door Lock Features**

- **600 and 1200 Lb lock strength**
- **Single and Double Doors**
  - DKML
  - Magnetic Door Locks
  - **Magnetic Door Locks**
    - DKML-S12 1200 Lb
      - Armature and Maglock
      - DKML-S6 600 Lb
      - Armature and Maglock
      - **Armature and Maglock**
        - DKML-M6 2000 Lb
  - Available for double door applications - DKML-S12 and DKML-S6
  - **Armature and Maglock**
    - DKML-M20 2000 Lb
  - **Available for double door applications - DKML-S12 and DKML-S6**

**Compatible with these DKS telephone and access devices**

- **Basic Telephone**
- **Access Plus 1850 Series**
- **Kypads**
- **Card Readers**
- **Transformer Box and Transformers**
  - **Magnetic Locks**
    - 24 Volt DC
  - Transformer box includes up to 4 transformers, and is suitable for indoor and outdoor use
  - **DF transformers and Regular DKS transformers** available

**Accessories**

- Use the 350mA transformer for 600 Lb locks, 500mA for 1200 Lb locks, and the 1000mA transformer for 2000 Lb locks.

**Shear Locks**

- 5/8 inch (15.875 mm) stainless steel
- Operate on 12-volt DC power
- Provide superior security and safety

**Electric deadbolts**

- Provide superior security and safety with fail-safe operational
- Operate on 12-volt DC power
- 5/8 inch (15.875 mm) stainless steel deadbolt with 5/8 inch throw

**Deadbolt and Strikes**

- Electric deadbolts
  - Provide superior security and safety with fail-safe operational
  - Operate on 12-volt DC power
  - 5/8 inch (15.875 mm) stainless steel deadbolt with 5/8 inch throw
