This kit is designed for the model 9000 slide gate operator only. Screw the posts into the base plate. Base plate mounts directly into a poured concrete foundation. It is recommended running all conduit inside the posts but flexible conduit can be run after the operator has been installed (See below).

**Kit includes:**
- 6 - bolts, lockwashers and nuts
- 12 - washers

**Installation**

**14” x 23” Minimum Concrete Foundation Size**
- Base plate must be 1” minimum away from gate frame.

**Concrete Foundation**
- Underground depth of the concrete foundation is determined by soil conditions and local building codes, 18” minimum depth. Reinforced concrete recommended.
- Operator must be a minimum of 4” above ground.

**3/4” conduit with sweeps run inside posts recommended.**

**Conduit suggestions:**
- High voltage AC conduit
- Low voltage access control device conduit
- Automatic exit loop conduit
- Reverse loop conduit

**PVC Conduit**
- Sweep YES
- Elbow NO

**Base Plate**
- MUST be level!
- Connect operator to base plate using hardware provided.

**Gate Frame**
- 14" x 23" Minimum Concrete Foundation Size
