• User adjustable variable speed control
• Slow-start / slow-stop operation
• High tensile strength roller chain provides a direct mechanical linkage to the gate, will not slip and is unaffected by weather or other contaminates such as dirt, oil, grease, ice, etc.
• Integral internal direct driven limit switch system cannot be tampered with externally
• 5-year limited warranty
**9530 MAXIMUM SECURITY OPERATOR**

**9530 3 HP**
54” W x 59” H x 26” D (137.16cm W x 149.86cm H x 66.04cm D)

### Mechanical Features

**Adjustable speed control circuit: 1-2 ft/sec**
- Slow start / slow stop
- Adjustable partial open
- Anti-tailgating
- Selectable stop / reverse loop function
- Direct driven limit switches
- Built-in power switch
- Built-in 3-button control (open-close-stop)
- Warn-before-operate function
- Built-in diagnostics check for specific fault conditions
- Port for plug-in loop detectors (DKS Detectors only)
- Two 115 VAC Convenience outlets
- Optional Gate Tracker reporting provides operator data to a companion DKS access control system (models 1833, 1835, 1837 and 1838)

### Technical Features

**9530 3 HP**

* Assumes gate to be in good condition and swinging in a level plane.

### Electrical

- Adjustable speed control circuit: 1-2 ft/sec
- Slow start / slow stop
- Adjustable partial open
- Anti-tailgating
- Selectable stop / reverse loop function
- Direct driven limit switches
- Built-in power switch
- Built-in 3-button control (open-close-stop)
- Warn-before-operate function
- Built-in diagnostics check for specific fault conditions
- Port for plug-in loop detectors (DKS Detectors only)
- Two 115 VAC Convenience outlets
- Optional Gate Tracker reporting provides operator data to a companion DKS access control system (models 1833, 1835, 1837 and 1838)

### Miscellaneous

- Environmental: 10°F to 140°F (-12°C to 62°C)
- Thermostatically controlled heater kit recommended for colder environments
- Shipping weight approximately 700-1,100 Lbs (317-499 kg)
- Depending on model and options selected

### Safety

This vehicular slide gate operator is designed for Class III and IV applications only and should never be used in applications serving the general public such as apartment complexes, gated communities, residential applications, parking garages, etc.

Operator requires Type B1 or Type B2 entrapment protection devices with 10K resistive termination, otherwise the operator will not function.
