A Custom System in 3 Simple Steps

1. Identify Your Property Type
   - Multi-Residential, Private Home, Small Business, Mixed Use

2. Is Voice Communication required for guests?
   - Yes: Add voice features using the available voice service.
   - Optional: Add with up to 23 telephones with the TRS Plus Phone line module (voice service not required).

3. How Many Access Points?
   - Standard up to 80 (or 20 with a standard telephone limited to 4 Access Points
   - Access control up to 25 additional entry points using cards, tags, or RF cards.

The Access Plus Telephone Entry line offers many of the same features as a full blown access control system, but with smaller applications at a much lower cost. These are PC programmable systems that are designed for up to 27 users, but control both entry points and are easily available to control in additional entry points.

Use your PC to customize your access control system. After installation of the latest Access Plus Access Manager software, you can connect to the system via Ethernet, internet, or even over PSTN and begin to use the system immediately. The system can be used for a variety of homes, such as entrance, house, or even as a secondary phone line with the call of the entrance.

Software
Program and monitor access activity from your PC. Can be made from the computer.

Enhanced Features
- Manage multiple systems
- Create new accounts
- Program card and cardholder names
- Set and run time zones and holiday schedules

The DKS Access Plus Access Manager Software can be used on a new installation from the manufacturer site: www.doorking.com/telephone/software

A Custom System in 3 Simple Steps

1. Identify Your Property Type
   - Multi-Residential, Private Home, Small Business, Mixed Use

2. Is Voice Communication required for guests?
   - 27 Auto-dialed entries using the virtual office phone service.
   - Connects to up to 23 telephones with the VOD Access Plus Phone Line module (virtual office phone service not required).

3. How Many Access Points?
   - Connects to up to 22 entries or gates via a telephone connection.
   - Quick control for up to 10 additional entries using card, keypad or EPIC controls.

The Access Plus Telephone Entry System offers many of the same features as a full-access control system, but for smaller applications at a much lower cost. There are 24 pre-programmed systems that are designed for up to 27 users, with control over entry points and are easily expanded to control additional access points.

Use your PC to customize your access control system. After installing the dedicated Access Plus Access Manager software, you can connect to the system via Ethernet, internet, or even via PSTN and begin to locate the access control system (110 access points), web-based users, web and default names, phone numbers, access codes, set up email notifications, and even lock down an exit door with the click of the mouse.

Software
Program and monitor access activity from your PC. Connects open from the computer.

Enhanced Features
- Manage multiple systems
- Update new accounts
- Program card and keypad in numbers
- Set events and time zones and holiday schedules

The DKS Access Plus Access Manager Software is a Windows-based, web-based product that is available at no charge from the building site web site: www.doorking.com/telephones/software
