ACCESS PLUS
TELEPHONE ENTRY SYSTEMS

Residential • Small Multi Unit • Small Commercial/Industrial

ACCESS CONTROL SOLUTIONS
**FEATUES**

**Grant Guest Access**
Grant or deny access directly from a touch-tone telephone.
Use a mobile phone number to receive calls from the Access Plus system and grant or deny access.

**PC Programmable**
Program using a Cellular, Internet or POTS connection.

**Control 2 Doors or Gates + 6 Additional Entry Points**
**TELEPHONE ENTRY SYSTEMS**

**1812 Access Plus**
Single Family Homes / Estates

The 1812 AP is perfect for single family homes / estates with its capabilities to control up to six (6) access points.

**1838 Access Plus**
Small Business and Commercial

Small business access control where voice communication is not a requirement.

Voice communication to home or mobile phone
Add 6 additional entry points - using card, keypad, or proxy RF devices

Access control to commercial / light industrial
Add 6 additional entry points - using card, keypad, or proxy RF devices

**Connection Options**
Voice and programming (data) connection over either Cellular, Internet, or traditional copper POTS lines. (POTS is not recommended as DoorKing can no longer guarantee modem connections.)

**System Expansion Accessories**
Connecting devices with wire runs up to 4000 feet from the access controller.
## SPECIFICATIONS

### ALL MODELS

- Control up to two (2) doors or gates via a touch-tone telephone
- Up to six (6) access control devices (card readers, keypads, RF controls, relay board) can be added to the Access Plus system
- 100 device codes (card, keypad, transmitter)
- 500 event history buffer
- 10 temporary access codes
- Holiday schedule
- Four (4) hold open time zones
- Schedule un-lock / lock times
- Email notifications

### CONNECTION METHODS

- Cellular (powered by AT&T* 4G LTE)
- Internet
- POTS (Plain Old Telephone Service)

### ACCESS CONTROL DEVICES (RS 485)

- Card readers (DK Prox, AWID, HID)
- Keypads (surface or flush mount)
- MicroPlus RF controls
- Relay Board (allows use of an existing 26-bit wiegand device to be used with the Access Plus system)

ACCESS PLUS TELEPHONE SYSTEMS: ACCESS CONTROL + VOICE COMMUNICATION

A Custom System in 3 Simple Steps

1. Identify Your Property Type
   • Multi-Resident, Private Home, Small Business, Mixed use.

2. Is Voice Communication required for guests?
   • 27 Auto-dial numbers using the central office phone service.
   • Connect with up to 23 telephones with the 1816 Access Plus “No Phone Line” module (central office phone service not required).

3. How Many Access Points?
   • Control up to two (2) doors or gates via a touch-tone telephone.
   • Access control for up to six (6) additional entry points using cards, keypads or RF control.

The Access Plus Telephone Entry line offers many of the same features as a full blown access control system, but for smaller applications at a much lower cost. These are PC programmable systems that are designed for up to 27 users, can control two entry points and are easily expandable to control an additional six entry points.

Use your PC to customize your access control system. After installing the Access Plus Account Manager software, you can connect to the system via Cellular, Internet, or Plain Old Telephone Service (POTS)* and begin to customize the system immediately. Set up time zones, add or delete names, phone numbers, access codes; set up email notifications, and even lock or un-lock a door with the click of the mouse. *DoorKing cannot guarantee modem communication using POTS lines and this type of connection is not recommended for programming purposes.

Software
Program and monitor access activity from your PC.
Command open from the computer.

Enhanced Features
• Manage multiple systems.
• Create new accounts
• Program card and transmitter numbers
• Set hold open time zones and holiday schedules

The DKS Access Plus Account Manager Software (.exe file) is available as a free download from the DoorKing web site: www.doorking.com/software

SYSTEM EXPANSION:

Card Readers & Keypads
DoorKing carries a full line of DKS, AWID and HID proximity card readers and cards. DKS 1500 Series Keypads provide access control for virtually any application where stand-alone digital code entry is desired.

1816 Access Plus
Expands the capabilities of the Access Plus systems (except 183B) to include facilities without active phone service.

Wiegand Converter
Accepts input from 26-bit wiegand devices and then converts this data to RS-485 protocol for communications with the Access Plus system.

RF MicroPlus Proximity Readers
Remote operation of vehicular access gates from the safety and convenience of a vehicle. MicroPLUS® RF products provide the highest level of security available.

Add-on Directories
Three different directory models are available, and are typically used when electronic type directory systems are unavailable or don’t make economic sense. Non-lighted directories models hold up to 20 or 60 names. The lighted directory model is available in surface or flush mount. Create your own directory on a single sheet that easily slips into lighted enclosure.

Mounting Posts
Mounting posts can be used for vehicular or pedestrian traffic, and are designed to be pad mounted or mounted using the in-ground mounting adapter. The Standard mounting posts are ideal for smaller telephone entry and access control devices. The Architectural style posts are designed for the larger telephone entry systems.

ACCESSORIES:

Cellular Connection
A wireless solution for connecting managers and users to access control systems. Voice and data via the AT&T 4G LTE network (requires DKS cellular subscription).

Internet Connection
The 2334 adapter connects to your Internet and provides both voice (VoIP) and data service for your Access Plus system (requires DKS data over Internet subscription).

Software
Program and monitor access activity from your PC.
Command open from the computer.

Enhanced Features
• Manage multiple systems.
• Create new accounts
• Program card and transmitter numbers
• Set hold open time zones and holiday schedules
