GENERAL NOTES

• Automated vehicular gates shall be designed and installed to be in strict compliance with the UL 325 Safety Standard and the ASTM F2200 Construction Standard.

• Automated vehicular gates that do not meet the requirements of these standards shall not be allowed.

• This drawing is for the sole purpose of general gate operating system and location, photo beams coverage and placement, and vehicular loop dimensions and placement. Drawings are not all inclusive or guaranteed to scale.

• No considerations have been made for grade, existing public utilities, landscape, damages, site peculiarities, or requirements by the authority having jurisdiction, ie; Fire Marshal, Building Inspector, Street and Alley Department.

• Warning Signs must be installed and be highly visible upon entry into the property, and must remain in place for the life of the gate operating system.

• Proper lane identification and vehicular direction signs should be highly visible upon entry to the property.

• Gate dimensions, poles, guide rollers, photo beams, reversing edges, hinges, and other gate hardware may vary in size, dimension, and placement and should not be used as an exact reference.

• All loop sizing and placement dimensions indicated are solely intended for reference only, and not intended to be the final criterion for determining the loop sizing and placement on any automated vehicular gate project.

• DoorKing, Inc does not assume responsibility or liability for any installation with regard to proper installation, malfunction, vehicle detector loop sizing and placement, or consequent damages or injuries caused thereby.

• DoorKing, Inc does not assume responsibility or liability for the installation and unauthorized changes to the design and operation of equipment, or alterations to the final site plan.
Photo-beam must cover the entire travel of the gate!
